Abbildung 1: DC-Motor

DESCRIPTION

Product name : N20 motor

Specification size : total length 35mm shaft length 9mm

Voltage range : 1.5V-12V

Weight : ≈ 9.5g

Application : Intelligent remote control car, model plane, electronic door lock, automatic door lock, toy car DIY professional motor, camera...

Diameter : 12mm Body without shaft length :26mm

Output shaft length : 10mm(D-type shaft)

Warm prompt

The motor is a miniature DC motor with small size. We will not arrange shipment until the motor is tested. After receiving the motor, we will test and install it first.

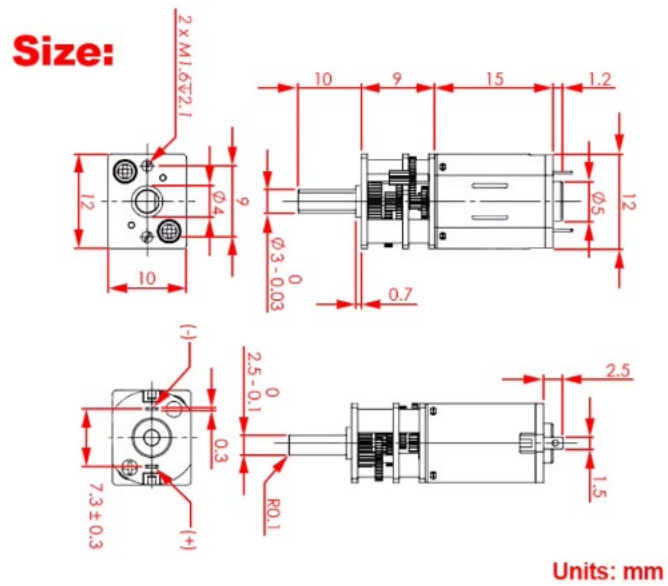

Construction: Permanent Magenet

Type: Gear Motor

Commutation: Brush

Protect Feature:Drip-proof
